# Network location platform

NEUTRALITY. SCALABILITY. TECHNOLOGICAL EDGE.

While Network Equipment Providers (NEPs) excel in delivering essential features aligned with industry standards, Intersec introduces a distinctly scalable and business-centric approach and employs advanced geo-specialized algorithms to facilitate the extraction of meaningful business insights.

❌ Not supported
⭕ Partially supported
✔ Fully supported

	NEPs	intersec	Benefits explained
Compliance	✔	✔	Location regulatory compliance
Standardization	✔	✔	3GPP/OMA/CAMARA
Passive mode accuracy	⭕	✔	NEPs passive location solutions are limited to CellID accuracy
Stealth/detectability	⭕	✔	Active/passive orchestration reduces interactions with mobiles
Mass scale	⭕	✔	NEPs have basic passive solution, no orchestration with active
Response Time	⭕	✔	Cache from passive geolocation provides instant results
Project execution	⭕	✔	Installation time of Intersec solution 2x faster than NEPs
Interoperability	❌	✔	The Intersec solution is vendor neutral: interfaces with any NEPs
LBS/monetization	❌	✔	Intersec provides off-the-shelf apps for instant monetization
Advanced features	❌	✔	Proximity detection, OD matrix, density maps, AI features…
