GEOSAFE LI + INTERSEC AI NETWORK & LOCATION INTELLIGENCE TO SOLVE THE MOST COMPLEX CASES.

- Counter-terrorism
- Counter-intelligence
- Border control
- Crime investigations
- Trafficking & smuggling
- VIP security
- Prison security
- Missing persons

This individual is a suspect in the missing person case #8335. I'm looking for insights from August 12 to 26.

This individual is a suspect in the embassy bomb attack. I'm looking for recent suspicious activities.

Intersec fuses all network metadata, records, digital footprints and location data.

REVEAL	Hidden connections, suspicious patterns of life, similar trajectories...
PREDICT	Threats, anomalies and behaviours. Anywhere. Anytime. Any device.
AUTOMATE	Alerts, workflows, and scenarios.
ASSIST	Context-aware recommendations & AI assistance, even for non-technical users.

5K location points
Per SIM card
per day

100% people & devices
connected
on your territory

40 location techniques
most extensive
catalogue on the market

CASE STUDY

Cracking a high-profile homicide investigation through cross-network intelligence in a densely populated Asian country

The platform gave us something we could never have built manually: a clear picture of who was moving with our target, across every network in the country, instantly. Combined with network analysis and AI-enhanced patterns of life analysis, it transformed what would have been days of fragmented requests into a single, decisive investigative step.

– Senior investigator, national LEA (identity withheld for operational security)
